

Environmental Impact Statement & Policy

Location: Maidenhead UK

Date: 06/01/2026

1. Commitment to Sustainability

We are committed to minimising our environmental impact and promoting sustainable practices throughout our operations. As a small sewing factory operating within an existing shopping centre, we align with the centre's management of water, electricity, and waste streams while striving to exceed industry standards for environmental responsibility.

2. Energy Efficiency

- We invest in modern, energy-efficient sewing equipment to reduce power consumption.
- All machinery is maintained regularly to ensure optimal performance and minimal energy waste.
- We monitor electricity usage and seek opportunities to further reduce consumption.

3. Waste Management

- **Fabric Waste:** All offcuts and surplus fabric are returned to customers with their deliveries, ensuring transparency and enabling reuse or recycling.
- **Packaging:** We minimise packaging and use recyclable materials wherever possible.
- We comply with the shopping centre's waste management protocols for general and recyclable waste streams.

4. Water Usage

- Water supply and disposal are managed by the shopping centre; we follow all guidelines to prevent contamination and reduce unnecessary water use.

5. Materials & Sourcing

- We encourage the use of sustainable fabrics and work with customers to support environmentally responsible sourcing.
- Where possible, we prioritise suppliers who share our commitment to sustainability.

6. Continuous Improvement

- We regularly review our environmental practices and seek innovative ways to reduce our footprint.
- Staff are trained and encouraged to adopt eco-friendly habits in daily operations.

7. Compliance

- We comply with all relevant UK environmental legislation and shopping centre policies.
- We aim to meet or exceed industry best practices for sustainability.

8. Communication

- This policy is communicated to all employees and made available to customers upon request.
- We welcome feedback and collaboration to improve our environmental performance.
